

§ 417.196

Effluent characteristic	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
English units (pounds per 1,000 lb of anhydrous product)		
BOD ₅	0.60	0.30
COD	2.70	1.35
TSS	0.20	.10
Surfactants	0.40	.20
Oil and grease	0.04	.02
pH	(¹)	(¹)

¹ Within the range 6.0 to 9.0.

§ 417.196 Pretreatment standards for new sources.

Any new source subject to this subpart that introduces process wastewater pollutants into a publicly owned treatment works must comply with 40 CFR part 403.

[60 FR 33956, June 29, 1995]

PART 418—FERTILIZER MANUFACTURING POINT SOURCE CATEGORY

Subpart A—Phosphate Subcategory

Sec.

418.10 Applicability; description of the phosphate subcategory.

418.11 Specialized definitions.

418.12 Effluent limitations and guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

418.13 Effluent limitations and guidelines representing the degree of effluent reduction attained by the application of the best available technology economically achievable.

418.14 [Reserved]

418.15 Standards of performance for new sources.

418.16 Pretreatment standards for new sources.

418.17 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology.

Subpart B—Ammonia Subcategory

418.20 Applicability; description of the ammonia subcategory.

418.21 Specialized definitions.

418.22 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best

40 CFR Ch. I (7–1–06 Edition)

practicable control technology currently available.

418.23 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

418.24 [Reserved]

418.25 Standards of performance for new sources.

418.26 Pretreatment standards for new sources.

418.27 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology.

Subpart C—Urea Subcategory

418.30 Applicability; description of the urea subcategory.

418.31 Specialized definitions.

418.32 Effluent limitations and guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

418.33 Effluent limitations and guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

418.34 [Reserved]

418.35 Standards of performance for new sources.

418.36 Pretreatment standards for new sources.

Subpart D—Ammonium Nitrate Subcategory

418.40 Applicability; description of the ammonium nitrate subcategory.

418.41 Specialized definitions.

418.42 Effluent limitations and guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

418.43 Effluent limitations and guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

418.44 [Reserved]

418.45 Standards of performance for new sources.

418.46 Pretreatment standards for new sources.

Subpart E—Nitric Acid Subcategory

418.50 Applicability; description of the nitric acid subcategory.

418.51 Specialized definitions.

418.52 Effluent limitations guidelines representing the degree of effluent reduction

Environmental Protection Agency

§ 418.11

attainable by the application of the best practicable control technology currently available.

418.53 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

418.54 [Reserved]

418.55 Standards of performance for new sources.

418.56 Pretreatment standards for new sources.

Subpart F—Ammonium Sulfate Production Subcategory

418.60 Applicability; description of the ammonium sulfate production subcategory.

418.61 Specialized definitions.

418.62 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

418.63 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

418.64 [Reserved]

418.65 Standards of performance for new sources.

418.66 Pretreatment standard for new sources.

418.67 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best conventional pollutant control technology.

Subpart G—Mixed and Blend Fertilizer Production Subcategory

418.70 Applicability; description of the mixed and blend fertilizer production subcategory.

418.71 Specialized definitions.

418.72 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best practicable control technology currently available.

418.73 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

418.74 [Reserved]

418.75 Standards of performance for new sources.

418.76 Pretreatment standard for new sources.

418.77 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best

conventional pollutant control technology.

AUTHORITY: 33 U.S.C. 1251 *et seq.*

SOURCE: 39 FR 12836, April 8, 1974, unless otherwise noted.

Subpart A—Phosphate Subcategory

§ 418.10 Applicability; description of the phosphate subcategory.

The provisions of this subpart are applicable to discharges resulting from the manufacture of sulfuric acid by sulfur burning, wet-process phosphoric acid, normal superphosphate, triple superphosphate and ammonium phosphate, except that the provisions of §§ 418.12, 418.13, and 418.17 shall not apply to wet-process phosphoric acid processes that were under construction either on or before April 8, 1974, at plants located in the State of Louisiana.

[52 FR 28432, July 29, 1987]

§ 418.11 Specialized definitions.

For the purpose of this subpart:

(a) Except as provided below, the general definitions, abbreviations and methods of analysis set forth in 40 CFR part 401 shall apply to this subpart.

(b) The term *process wastewater* means any water which, during manufacturing or processing, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, by-product, or waste product. The term “process wastewater” does not include contaminated non-process wastewater, as defined below.

(c) The term, *contaminated non-process wastewater* shall mean any water including precipitation runoff which, during manufacturing or processing, comes into incidental contact with any raw material, intermediate product, finished product, by-product or waste product by means of: (1) Precipitation runoff; (2) accidental spills; (3) accidental leaks caused by the failure of process equipment and which are repaired or the discharge of pollutants therefrom contained or terminated within the shortest reasonable time which shall not exceed 24 hours after discovery or when discovery should
